## Summary

As a Brazilian native who now calls Australia home, I bring a diverse perspective to my work. My experience as a Mechanical Engineering student, Mathematics tutor and English teacher has sharpen my problem-solving skills and attention to detail. I'm always eager to learn new things, and my recent commitment to a career change has led me to explore front-end web development. Currently, I'm studying HTML, CSS, Sass, Bootstrap, JavaScript, and React.js with the goal of becoming a full-stack developer. I'm enthusiastic and motivated to take on new challenges and build a rewarding career in this dynamic field.
